Hey Rich. I am leaving on travel in a half hour and need to prepare for a project later this week. I know there will be some discussions going on this week or next with management. I don't think anything constructive will come of discussions between us prior to the management discussions. I got your message regarding other state regulations and how they might play into this. Rest assured we are looking into those aspects as well. Regardless of when management has these discussions, I will contact you next week to let you know the results and/or impacts of management's decisions. Best regards

Hey Rich, upper management will be discussing this later this week or next, and have plans to coordinate with PADEP to clarify the issue hopefully. They have to hash things out before I can start discussing and/or advising. I'll let you know what is going on as things happen and decisions get made. best regards

Hey Rich. Thank you for the info. I have been out of the office for a while for various reasons. I will be speaking with my management this week about our

current status on this issue, and will get back to you tomorrow to touch base regarding the TSCA regulations and how they mesh with beneficial use/clean fill. Best regards

I left you a message this afternoon with respect to a beneficial use project that I am working to remediate in Palmerton, PA. The site is using Regulated Fill that is being placed by Phase III Environmental, LLC. The owner of Phase III has asked me to contact you to begin a dialogue to bridge the Agency's application of the TSCA rules with New York and New Jersey cleanup and remediation standards. It is my hope to get representatives together into a meeting or teleconference to confer on PCB-impacted waste and how we may consider management options.
